

8 Hour Shine Control

N ACTION INGREDIENTS This lightweight, oil-control formula utilizes Nylon-12, a powder that absorbs up to 400 times its weight in oil, to capture excess oil on the skin for up to eight hours.

Farnesol Complex, a Swiss-produced ingredient proven to decrease surface oiliness within 15 days of beginning daily application, adds further control over oily shine. This oil-control system helps reduce visible shine, prevents clogged pores, and reduces the appearance of enlarged pores. 8 Hour Shine Control also keeps makeup looking fresh throughout the day.

Antimicrobial essential oils of Tea Tree, Thyme, Sage, and Eucalyptus help control problematic bacteria on the skin's surface, helping to reduce the likelihood of breakouts. At the same time, humectant peptides from Hawaiian Red Marine Algae keep skin moist and comfortable.

It does not contain artificial color or fragrance, skin-dehydrating alcohols, or parabens.

FRAGRANCE Essential oils of tea tree, eucalyptus, thyme and sage

pH 6.1

SOLUBILITY Water soluble

How to Use

Home Care | After cleansing and toning, apply 1 pump to four square inches of skin surface.

CONTRAINDICATIONS: Skin sensitivity to essential oils and plant extracts is possible. A patch test is advised before recommending to highly allergic individuals.
