

Lipid Repair & Comfort Fluid

Lightweight, deeply moisturizing lotion infuses sensitive, barrier-damaged skin with rejuvenating lipids, ultra-soothing antioxidant plant extracts, and phytonutrients. Instantly, skin is remarkably soft, plump, supple, and comfortable. Results continue to improve with twice daily application.

Lipid Repair + Comfort Fluid delivers the following Triple-Revival Strategy to repair, protect and soothe skin, instantly and long-term.

1 – Rapid Barrier Repair | Rejuvenating ceramides and a complex of barrier-fortifying lipids in healthy skin are instantly infused between cells to revive soft, supple, and comfortable skin rapidly.

2 – Long-Lasting Barrier Protection | Encapsulated, time-released repair agents bring barrier lipids into youthful balance to inspire long-lasting comfort, hydration, and barrier protection. Multiple antioxidants keep barrier lipids fresh, supple, and protected from smog, smoke, and other oxidants.

3 – Instant and Long-Lasting Soothing | Beta Glucan, EGCG, Brazilian Gooseberry, and other calming Plant Extracts and Phytonutrients soothe visible redness and additional signs of irritation while helping to interrupt the cycle of inflammation that prolongs sensitivity. The result is skin that feels healthier immediately, acts healthier long-term – even when faced with irritants and environmental pollutants that may have been hard to withstand in the past.

Dermatologist tested for sensitivity and irritancy. Does not contain fragrance, essential oils, colorants, volatile alcohols, urea, sulfates, acids, strong emulsifiers, lanolin, mineral oil, formaldehyde-releasing preservatives, parabens, or other commonly used sensitizers. Vegan.

FRAGRANCE None

pH 5.3

SOLUBILITY Water-based emulsion

Home Care | After cleansing with Sloe = Chamomile Gentle Cleanser, apply a small-to-moderate amount of fluid to the face, throat, and around the eyes if eye cream is not used. To reduce friction and help prevent redness during application, warm fluid between fingertips and lightly pat and press into the skin. Allow to absorb before applying makeup.

CAUTION: This formula has been formulated to meet the needs of truly sensitive skin. However, theoretically, some skin types may still be unable to use this product. It is recommended that ultra-sensitive clients perform a patch test on the inner forearm or the neck area under the ear 24 hours before using this product over the entire face and neck
