

Pore Ecology Balance Astringent

Refreshing, exfoliating astringent helps correct visible imperfections without drying skin. Purifying Sage, Thyme, Eucalyptus and a patented blend of the most active fractions of New Zealand and Australian Tea Tree oils work quickly to balance hostile flora deep within pores without causing irritation or redness.

Natural AHAs from citrus, apple, and sugar cane are combined with a time-released, skin-conditioning BHA to smooth rough, flaky skin commonly seen with acne. Oxidized sebum, which combines with dead cells to form sebaceous plugs, is also dissolved, helping to free clogs from pores with minimal extraction effort.

A proprietary form of Green Tea and Dipotassium Glycyrrhizate, a soothing molecule from licorice, counteracts visible redness and discomfort common in acne-prone areas. Within days, congested or acne-prone skin looks clearer, feels smoother, and acts healthier.

Does not contain benzoyl peroxide, colorants, synthetic fragrances, or parabens.

Betaine Salicylate | natural skin conditioner from sugar beets complexed with keratolytic BHA; provides time-released exfoliating action long after cleanser is rinsed away

4-Terpineol | highly purified active fraction of Australia Tea Tree Oil; delivers broad-spectrum inhibition of hostile skin flora without irritation or allergens associated with pure Tea Tree Oil

Leptospermum Scoparium Oil | New Zealand Tea Tree Oil provides broad-spectrum inhibition of hostile skin flora without

irritation or allergens associated with pure Tea Tree Oil

Sugar Cane, Citrus & Apple | Natural AHA blends gently work to dissolve sebum in clogged pores. Green Tea | soothes signs of redness and calms discomfort. Dipotassium Glycyrrhizate | soothing molecule from licorice calms on contact

FRAGRANCE Tea tree, eucalyptus, wild thyme & sage essential oils

pH 4,0

SOLUBILITY Water-based liquid
