

Quick Calm+Comfort Complex

Relieves discomfort on contact and signs of redness within minutes. Keeps skin calm for hours. Instantly soothes tingling, stinging, signs of reactivity, irritation, and sunburn after waxing or tweezing, before and after AHA and other irritating treatments, laser, microdermabrasion, or other non-ablative procedures.

It helps protect barrier lipids when skin is exposed to free radicals in tobacco smoke, urban smog, or UV. Controls excess radicals contributing to daily inflammation – the bottom line of sensitive skin, aging, and acne. This high-potency formula features laboratory and clinically-studied action ingredients at their dose-dependent percentages to deliver instant, long-term calming, deep, long-lasting hydration.

Inoveol® EGCG (Epigallocatechin Gallate Glucoside) | highly stable, time-released form of the active antioxidant complex from Green Tea (EGCG) quickly relieves visible redness and calms signs of inflammation

Cortinhib (Helichrysum Italicum Extract) | inhibits the visible effects of cortisol, controlling signs of aging due to stress; anti-inflammatory, anti-allergic, and antimicrobial
Kola, Mate & Guarana Extracts | reduces signs of irritation caused by AHAs, sunscreens, acids

FRAGRANCE None

pH 5.6

SOLUBILITY Water-based gel

Home Care | Gently apply 1-3 IQuik Calm + Comfort Complex pumps over sensitive areas. Whenever possible, apply to clean skin. Wear alone or under moisturizer.
