

Triple Peptide Eye Serum

Triple Peptide Eye Serum Helps clear the appearance of puffiness, dark circles and eye creases.

Peptide Blends include:

Palmitoyl Tripeptide-1 can help strengthens underlying support structures which helps visible skin damage.

Palmitoyl Tetrapeptide-7 helps reduce inflammation and redness Continued use restores a firmer eye area to have a less line appearance

Acetyl Hexapeptide-8, Lessens wrinkles by preventing muscle contractions, sorta like Botox. Collagen Product is stimulated which is an important role in keeping skin firm and smooth.

These combined peptides activate surface renewal, resulting in visibly thicker, tighter eye area and gives illuminance to dark circles

How To Use

Dispense 2 to 3 drops of serum onto fingertip. Gently pat around eye area. Use twice daily for best results
